**Shriners Hospitals  
for Children®**  
**Love to the rescue®**

Dear Graham,

During the hot summer months, kids will be kids — running, jumping, goofing around. But many fun-in-the-sun activities can lead to life-changing injuries.

At Shriners Hospitals for Children®, we know accidents happen, especially in the summertime. And oftentimes those fun-loving kids end up in our care. That's just what happened when tragedy struck one brave little girl, Sydney, six years ago...

While on summer vacation, Sydney (then six years old) lost her right forearm in a devastating boating accident. Her healing began when she received a prosthetic arm and occupational therapy at Shriners Hospitals for Children – St. Louis.

**Help provide state-of-the-art medical treatments to the kids like Sydney who come through our doors, regardless of their families' ability to pay.**

Despite her injury, Sydney had ambitions to get back in the water. She worked tirelessly with her team of doctors and therapists at Shriners Hospitals, and now she's a competitive swimmer — most recently completing a triathlon!

**Please donate now to give the gift of healing, hope, and happiness to kids in need this summer.**

We depend on the kindness of supporters like you to make our work with children and families possible.

Thank you for your generosity. Have a happy, safe summer!

Sincerely,

Jerry G. Gantt  
Chairman, Board of Directors

P.S. Remember, many accidents happen in the summertime. We need your support to ensure all children can receive the care they need. **Please, send your Love to the rescue® today!**
